EDUCATION

Paralegal Technology -Durham Technical College

2025

Project Management -PMI Institute

2024

Software Engineering - Cuny University

2022

B.A Business Administration- Howard University

2017

Paralegal graduate with hands-on experience analyzing legal records, identifying causes of license suspensions, and drafting client advice letters through a North Carolina pro bono legal clinic. Background in compliance, documentation, and data analysis, with additional experience in technology and case management systems. Strong ability to translate complex information into clear, actionable legal communication.

SKILLS AND TECHNOLOGIES

Administrative & Clerical:

Reception duties, front-desk support, multi-line phone systems, appointment scheduling, filing (digital & physical), records management, document preparation, data entry, customer service, mail handling, office equipment operation (scanners, copiers, fax), maintaining logs & tracking systems.

Legal & Compliance:

Legal document drafting (memos and correspondence), judicial records management, and utilizing Case Management Software (CMS) and Electronic Filing (E-Filing) systems

Others:

NodeJS, ReactJS, Express, Flask
MS Office Suite (Word, Excel, Outlook),
Google Workspace, JIRA , AWS,
CRM/Ticketing systems (generalize experience)

WORK EXPERIENCE

Driver's License Restoration Project, *Pro Bono Legal Volunteer*

North Carolina Pro Bono Resource Center (Virtual) | 2026

- Reviewed and analyzed **driving records and legal histories** to determine causes of license suspension
- Identified legal issues related to **failure to pay fines, court debt, and compliance barriers**

- Drafted **legal advice letters** for clients seeking license restoration using standardized legal templates
- Applied North Carolina law to real client scenarios under attorney supervision
- Ensured accuracy and clarity in legal documentation reviewed by supervising attorneys

Software QA , *US Army Reserves (AWS), Norfolk VA*

May 2024 – Current

- Performed manual and automated testing on secure military and enterprise systems, ensuring data accuracy, operational reliability, and compliance with Army cybersecurity protocols.
- Developed and executed test plans, test cases, and regression tests for web and API-based systems built with Flask, Express, and ReactJS, reducing defect leakage by 35%.
- Utilized Python and JavaScript scripts to automate repetitive QA tasks such as data validation, test report generation, and log parsing—cutting manual testing time by 40%.
- Collaborated with developers and analysts using JIRA to document, prioritize, and track bugs through the full lifecycle, increasing release quality and transparency.
- Designed Postman API test collections for Army logistics applications to validate endpoints, authentication layers, and error-handling workflows.
- Conducted database verification using SQL queries to confirm data consistency across integrated systems.
- Supported User Acceptance Testing (UAT) and training sessions for new software rollouts to Reserve personnel, ensuring mission-critical usability and reliability.
- Authored detailed QA documentation, including bug logs, release notes, and standard operating procedures (SOPs), improving knowledge transfer for future testing cycles.

Software Development Engineer Intern, *Amazon Web Services (AWS), Seattle WA*

May 2023 – May 2024

Worked on the AWS Lambda Console team, focusing on front-end development.

- Handled integration of consumer analytics with an internal tool for effective visualization of data.
- Built, tested, and deployed support for user interaction tracking for the AWS Lambda Console.
- Designed and implemented data structures in TypeScript for storing labels for tracking element usage.
- Optimized 20+ react components for context-based passing of metadata to extract essential metrics.
- Established uniform tracking mechanism for function and class-based components for future changes.

Software Development Engineer , *Talkdesk , Remote*

2022 –2024

- Built, tested, and deployed support for user interaction tracking for the AWS Lambda Console.

- Led the creation of a customer communications team and learning ecosystem in collaboration with cross-functional teams, utilizing customer success management (CSM) strategies to boost satisfaction by 20% through initiatives such as chatbot deployment.
- Optimized 20+ react components for context-based passing of metadata to extract essential metrics
- Diagnosed and troubleshoot issues related to calls quality of service (QoS), IVR routing, app connections and integrations
- Championed a cross-functional team through the execution of 25 projects, adeptly aligning efforts with 15 diverse stakeholders across departments. Ensured strategic alignment with objectives, resulting in the successful and timely delivery of all project goals.

Project Manager ,Sita, RDU Airport

May 2018 – Mar 2022

- Regularly monitored project progress, assessed against desired KPIs, and provided critical insights to key executive stakeholders to facilitate consistent alignment with strategic business goals and desired project outcomes.
- Mentored and developed 3 learning and development specialists to scale their abilities to manage up to 15 projects simultaneously; consistently maintained meticulous documentation, from project plans and schedules to budgets, ensuring full transparency and effective resource allocation.
- Led a 25-person project team across Sales, Marketing, Engineering and Product to enhance, develop and facilitate key training modules for direct and partner channel sales; enabled and achieved an 18% increase in KPIs (revenue, sales productivity, etc.) through effective go-to-market strategies. Onboarded, mentored, and developed a team of 4 learning and development specialists to scale department's ability to deliver.

Manager of Operations, LCI

May 2016 – Mar 2020

- Managed B2B partnerships including client on-boarding which resulted in increasing partners by +450%
- Led the implementation and deployment of multiple software solutions for achieving operational goals
- Managed registration finance/accounting operations including budgeting, accounts payable, accounts receivable, and donations tracking
- Spear-headed new marketing initiatives including revamping the promotional calendar, deploying a social media strategy, and increasing client engagement through MailChimp and marketing material production and disbursement which led to increased attendance to events by +300%
